

About Green Source Technology

Green Source Technology is a vertically integrated manufacturer and provider of solar tracking related OEM, ODM, and integration services in East Asia. Green Source Technology originated as a manufacturer of linear actuators and slewing drive in 1977, and since 2007 has applied this extensive experience with mechanical actuation components towards the provision of a superior solar tracking product. Our customers include Taiwanese local and state agencies, transnational corporations, and solar project developers with projects ranging from small commercial to utility scale. With company headquarters in Taipei and manufacturing bases located in Taichung (ROC), Guangdong and Beijing (PRC), Green Source Technology provides the high quality associated with Taiwanese management, engineering and manufacturing along with competitive pricing for all markets.
